Summary

AI and Digital Transformation Consultant with 6+ years at Deloitte, leading enterprise automation, integration, and analytics programs for Fortune 500 clients across retail, consumer, public services, and healthcare sectors. Leads AI and Automation strategy across client engagements, ideating and delivering AI-enabled solutions that create measurable impact for clients and the firm. Proven in owning delivery workstreams, reducing errors by 99.9%, saving 180+ hours per month through automation, and improving SLA adherence across mission-critical systems. Recognized for executive stakeholder engagement, cross-functional leadership, Python expertise, and building scalable solutions adopted across projects.

Professional Experience

Consultant – AI & Retail Automation Lead Deloitte Consulting USI (Offices of the US in India)

Bengaluru & Gurugram,
India
June 2023 – present

- Leads AI and Automation strategy across client engagements, driving ideation, development, and deployment of AI-enabled solutions that create measurable value for clients and the firm
- Architected and delivered a Python enterprise platform providing user authentication, ID management, message operations, format conversion, live monitoring, and cross-environment data browsing, eliminating all manual operations for the team
- Built a Python automation framework for production-to-testing-environment data migration covering bulk data download, format transformation, intelligent chunking for high-volume processing, and automated reporting - saving 180 hours per month with 99.9% error reduction
- Built 15+ automation solutions across server monitoring, health-check reporting, and data reconciliation workflows, stabilizing the enterprise batch ecosystem, reducing production failures by ~80%, and improving SLA adherence across peak retail cycles
- Built a job monitoring and alert system that transforms error detection from a 20-minute reactive cycle to proactive alerts within 5 minutes, ensuring operational continuity
- Owned end-to-end client delivery for large-scale Oracle retail integrations, delivering 30+ integration validations supporting mission-critical workflows and high-volume data movement for a Fortune 500 US retailer
- Led a team of 5+ consultants and analysts across delivery modules; led multiple PI Planning cycles coordinating 20+ cross-functional global teams, assessing testing requirements, formulating capacity and velocity, and managing component assignments; provided monitoring support and systems checks for critical business applications
- Served as Python Subject Matter Expert, conducting 4+ training sessions for 40+ practitioners and driving curriculum improvements that measurably raised technical capability across the team
- Represented the team in executive forums and leadership stand-ups, delivering KPI dashboards and impact reports that elevated visibility of automation and quality initiatives

Business Technology Analyst – Automation & Integration Deloitte Consulting USI (Offices of the US in India)

Bengaluru & Gurugram,
India
Aug 2020 – June 2023

- Designed 50+ scripts (Python, Shell, PL/SQL, Java) enabling 90% error reduction and 10x time savings across testing, monitoring, and reporting workflows
- Built a Java-based message publishing system, removing 2+ hours per day of manual effort and eliminating error-prone data publishing for a critical backend retail system
- Developed Python and Shell automation scripts saving 4+ FTE hours/day; created 5+ report automations keeping stakeholders informed and enabling prompt issue resolution

- Executed performance and integration testing for 20+ Oracle enterprise integrations, ensuring system reliability under peak business volumes and enabling production deployments
- Designed a multi-threaded Python API testing framework, replacing Postman for high-volume integration testing and enabling bulk parallel API call execution at scale

Early Professional Experience – Analyst & Cybersecurity Intern

India

Deloitte USI / EXL Services

June 2019 – June 2020

- Supported a healthcare client engagement at Deloitte USI, contributing to testing, data workflows, and delivery support during a 6-month industrial training program
- Performed vulnerability analysis and penetration testing at EXL Services across enterprise infrastructure and applications, strengthening security posture and risk awareness

Education

Thapar Institute of Engineering & Technology

Patiala, Punjab, India

Bachelor of Technology in Computer Engineering (Computer & Network Security)

June 2016 – Aug 2020

- Finalist, Smart India Hackathon 2018!!**LINEBREAK!!** - built Project Haazri, an automated attendance system for schools and colleges, adopted as a proof-of-concept for institutional governance
- Capstone Project: Secure Autonomous Interceptor Drone (SAID) using Python, OpenCV, and flight dynamics for real-time object detection and navigation
- Ranked nationally in college Toastmasters chapter for leadership communication and public speaking excellence

Certificates & Awards

Deloitte AI Certified: Deloitte AI Academy - 9-month program of learning, testing, and capstone delivery; ranked 3rd out of 134 practitioners by XP earned

Google Advanced Data Analytics Certificate: Advanced statistics, machine learning concepts, and large-scale data analysis

Google Data Analytics Certificate: SQL, data visualization, and analytical problem-solving

Oracle Certifications (Active): Multiple active Oracle certifications across database, integrations, and enterprise systems

Skills & Personal

AI & Automation: Python Automation (Advanced), Event-Driven Architecture (Kafka), AI Strategy, Analytics Pipelines, Near-Real-Time Monitoring, Machine Learning (Foundational)

Enterprise Systems: Oracle Integration Suite, Oracle DB, PL/SQL Optimization, Batch Processing, Enterprise Testing, Performance Engineering

Consulting & Delivery: Digital Transformation, Client Delivery, Agile/SAFe, Program Governance, Executive Reporting, Value Realization, Stakeholder Management

Programming & Tools: Python (Advanced), SQL (Advanced), PL/SQL (Advanced), Java (Proficient), Shell Scripting, NiceGUI, Streamlit, GitHub, CI/CD, Linux
