Summary

AI and Digital Transformation Consultant with 6+ years at a Big-4 firm, leading large-scale enterprise retail integrations, automation platforms, and analytics programs for Fortune-scale organizations. Proven in owning client delivery modules, eliminating up to 95% of manual operations, accelerating validation cycles from days to minutes, and improving SLA adherence across mission-critical systems. Recognized for executive stakeholder engagement, cross-functional leadership, and building scalable, reusable solutions adopted across teams and projects.

Professional Experience

Consultant – AI & Retail Automation Lead

Bengaluru & Gurugram

Deloitte Consulting USI (Offices of the US in India)

June 2023 – present

- Architected and delivered a Python-based enterprise UI platform (NiceGUI + Kafka) enabling zero-touch, cross-environment retail data flow (shipments, transfers, DESP messaging), eliminating human intervention, preventing data errors, and saving multiple hours of manual operations daily
- Owned end-to-end client delivery for large-scale Oracle retail integrations, supporting mission-critical workflows and high-volume data movement for a Fortune-scale US retailer
- Designed and deployed 15+ automation and analytics solutions across testing, monitoring, and reporting workflows, reducing manual effort by up to 95% and accelerating validation cycles from hours/days to minutes
- Stabilized enterprise batch and integration ecosystems by optimizing Oracle SQL and PL/SQL jobs, reducing recurring production failures by ~80% and improving SLA adherence across peak operational windows
- Built near-real-time database monitoring and alerting systems, cutting incident response times from ~20 minutes to under 5 minutes and improving operational transparency for leadership and support teams
- Developed secure, role-based business UI tools with authentication, token-based tracking, file management, and JSON↔XML conversion, enabling self-service cross-environment data operations without engineering dependency
- Led testing and validation of 200+ enterprise integrations, ensuring production readiness, fault tolerance, and error-free deployments
- Represented the team in executive forums and leadership stand-ups, delivering KPI dashboards, solution walkthroughs, and impact reports that increased visibility of automation and quality initiatives
- Led and mentored 5+ consultants, assigning delivery modules, driving onboarding, and maintaining team performance during team lead absence while coordinating across 7+ cross-functional teams
- Created executive-ready PPTs and video playbooks showcasing scalable automation frameworks, enabling solution reuse across multiple projects and internal teams

Business Technology Analyst – Automation & Integration

Bengaluru, KA & Gurugram, HR

Deloitte Consulting USI (Offices of the US in India)

Aug 2020 – June 2023

- Executed performance and integration testing for 100+ Oracle enterprise integrations, ensuring system reliability under real-world business volumes and peak operational loads
- Developed Python and Shell-based automation scripts, saving 4+ FTE hours per day and significantly reducing manual intervention across monitoring and reporting workflows

- Designed and delivered 15+ automation and analytics solutions eliminating 6+ hours of daily manual work and improving operational consistency
- Monitored batch and integration workflows, proactively resolving failures to maintain SLA compliance and business continuity
- Produced executive-ready operational and performance reports supporting data-driven decision-making by project and delivery leadership

Early Professional Experience – Analyst & Cybersecurity Intern

India

Deloitte USI / EXL Services

June 2019 – June 2020

- Supported a healthcare client engagement at Deloitte USI, contributing to testing, data workflows, and delivery support during a 6-month industrial training program
- Performed vulnerability analysis and penetration testing at EXL Services across enterprise infrastructure and applications, strengthening security posture and risk awareness

Education

Thapar Institute of Engineering & Technology

Patiala, Punjab, India

Bachelor of Technology in Computer Engineering (Computer & Network Security)

June 2016 – Aug 2020

- Finalist, Smart India Hackathon (SIH) 2018 — built Project Haazri, an automated smart attendance application adopted as a proof-of-concept for institutional use
- Capstone Project: Secure Autonomous Interceptor Drone (SAID Drone) using Python, OpenCV, and flight dynamics for real-time object detection and navigation
- Ranked #7 in college Toastmasters chapter, recognized for leadership communication and public speaking excellence
- Graduated with 7.5 CGPA, demonstrating consistent academic performance

Leadership Experience

Client Ownership & Delivery Governance: Owned client delivery modules, led sprint reviews, and delivered executive-ready KPI dashboards, solution walkthroughs, and impact reports

Team Leadership & Capability Building: Led and mentored 3–5 consultants across automation and integration tracks, accelerating onboarding, technical readiness, and delivery quality

Cross-Functional Program Coordination: Aligned delivery across 7+ global teams, coordinating PI planning, dependency management, and release readiness

Process Transformation: Drove automation initiatives eliminating up to 95% of manual operational workflows and improving system reliability

Stakeholder Engagement: Partnered with client leadership, product teams, and vendors to align delivery roadmaps, expectations, and business outcomes

Certificates & Awards

Deloitte AI Certified: Deloitte AI Academy — advanced program in AI, automation, analytics, and data-driven decision-making

Google Advanced Data Analytics Certificate: Advanced statistics, machine learning concepts, and large-scale data analysis

Google Data Analytics Certificate: SQL, data visualization, and analytical problem-solving

Oracle Certifications (Active): Multiple active Oracle certifications across database, integrations, and enterprise systems

Skills & Personal

Strategy & Delivery: Digital Transformation, Client Delivery, Operating Model Design, Agile / SAFe, Program Governance, Executive Reporting, Value Realization

AI, Data & Automation: Python Automation, Analytics Pipelines, Near-Real-Time Monitoring, Data Reconciliation, Machine Learning (Foundational), Kafka

Oracle & Enterprise Systems: Oracle Integration Suite, Oracle DB, PL/SQL Optimization, Enterprise Testing, Batch Processing, Performance Engineering

Programming: Python (Advanced), SQL (Advanced), PL/SQL (Advanced), Java (Proficient), Shell Scripting

Tools & Platforms: Streamlit, NiceGUI, GitHub, CI/CD, Linux, Dashboarding & Visualization Tools

Languages: English (Fluent), Hindi (Native), Punjabi (Native), German (Basic)

Interests: Astronomy, Physics, Travel, Futurology
