Summary

Strategy and Digital Transformation Consultant with 6+ years at Deloitte, leading AI-enabled operations programs for Fortune 500 clients across retail, consumer, public services, and healthcare sectors. Leads AI and Automation strategy across client engagements, translating AI initiatives into measurable value for clients and the firm. Proven in owning end-to-end workstreams from problem definition and hypothesis structuring through executive recommendation, eliminating errors by 99.9%, saving 300+ hours per month across 40+ automations, and protecting business continuity across mission-critical systems. Recognized for building high-performing teams, advancing senior client relationships, and translating complex programs into defensible business outcomes.

Professional Experience

Consultant – Strategy & Digital Transformation *Bengaluru & Gurugram, India*
Deloitte Consulting USI
June 2023 – present

- Leads AI and Automation strategy across client engagements, setting the AI agenda, ideating solutions, and overseeing deployment for both client programs and internal firm operations
- Owned end-to-end delivery of a digital transformation program for a Fortune 500 US retailer, structuring the problem, defining hypotheses, leading cross-functional execution, and delivering executive-level recommendations
- Reworked a client's integration testing operating model with a 14+ skill AI framework, so a single FTE can run the full workflow end to end with AI assisting at every step; designed around strong engineering practices, data security, and deep domain knowledge, it automates manual steps and reduces human error
- Deployed 50+ operational improvements across mission-critical retail workflows, eliminating errors by 99.9%, saving 300+ hours per month across 40+ automations, and reducing 5+ hours of daily manual work to zero
- Reduced enterprise production failures by ~80% and cut incident response from ~20 minutes to under 5 minutes through systematic process stabilization
- Established real-time performance visibility for client leadership through structured KPI frameworks and executive dashboards aligned to commercial outcomes
- Led a team of 5+ consultants and analysts; led multiple PI Planning cycles coordinating 20+ cross-functional global teams, assessing testing requirements, formulating capacity and velocity, and managing component assignments; built scalable playbooks and briefing packs adopted across the program
- Provided monitoring support and systems checks for critical business applications during peak operational periods, ensuring SLA compliance and business continuity
- Recognized as Python Subject Matter Expert, conducting 4+ training sessions for 40+ practitioners and fostering a culture of technical capability and continuous learning

Analyst – Business Operations & Technology *Bengaluru & Gurugram, India*
Deloitte Consulting USI *Aug 2020 – June 2023*

- Designed 50+ automation scripts achieving 90% error reduction and 10x time savings, translating recurring manual processes into reliable, reusable systems
- Validated 100+ custom enterprise integrations across 40TB+ production Oracle ERP systems worked on directly — embedded in the client performance engineering team, tested for data integrity, system bridging, and production-scale readiness, with technical depth applied to keep implementation efficient
- Delivered 20+ enterprise integration testing workstreams, ensuring system reliability and production readiness under peak retail and logistics volumes
- Built automated reporting systems saving 4+ FTE hours/day, enabling data-driven decision-making for project and delivery leadership
- Resolved critical processing bottlenecks protecting time-sensitive, revenue-generating business workflows
- Developed structured onboarding and quality frameworks reducing consultant ramp-up time and improving delivery consistency

Early Professional Experience *India*
Deloitte USI / EXL Services *June 2019 – June 2020*

- Supported a large-scale ERP transformation for a major healthcare client at Deloitte USI — testing, data validation, and delivery operations
- Conducted security risk analysis and vulnerability assessments at EXL Services, strengthening enterprise compliance posture

Education

Thapar Institute of Engineering & Technology *Patiala, Punjab, India*
Bachelor of Technology in Computer Engineering (Business Systems & AI) *June 2016 – Aug 2020*

- Finalist, Smart India Hackathon 2018
- led the team to build Project Haazri, an automated attendance system for schools and colleges, recognized for scalable design and social impact
- Ranked for leadership communication and public speaking through Toastmasters International

Leadership & Impact

AI & Automation Strategy: Leads AI and Automation strategy across client engagements, translating AI investments into measurable client and firm value

Workstream Ownership: Owned client delivery end-to-end - problem framing, execution governance, and executive stakeholder reporting

Team Development: Led a team of 5+ consultants and analysts; mentored team members professionally; built onboarding frameworks adopted across the program

Cross-Functional Alignment: Led multiple PI Planning cycles coordinating 20+ global teams across dependency resolution, sprint planning, and release governance

Value Realization: 99.9% error reduction, 300+ hours per month saved across 40+ automations, 80% fewer production failures - quantified across client and firm programs

Certifications

Deloitte AI Certified: Deloitte AI Academy - 9-month program of learning, testing, and capstone delivery; ranked 3rd out of 134 practitioners by XP earned

Google Advanced Data Analytics: Professional Certificate — Statistical Modeling & Machine Learning

Oracle Certified Professional: Enterprise Integrations, Architecture & Systems

Skills

Strategy & Consulting: Problem Structuring, Hypothesis-Driven Analysis, Workstream Governance, Executive Engagement, Value Realization, Agile/SAFe

AI & Operations: AI Strategy, Process Excellence, Operational Improvement, Digital Transformation, Automation at Scale

Analytics & Quantitative: KPI Dashboarding, Data-Driven Decision Making, Python, SQL, PL/SQL, Oracle Enterprise Systems

Languages: English (Fluent), Hindi (Native), Punjabi (Native), German (Basic)

Interests

Strategic Recreation: Golf — long-horizon discipline, precision decision-making, and performance under pressure

DJing: Afro House, EDM, and Techno - reading a room, controlling energy, and knowing exactly when to shift the moment

Aviation & Systems: Flight simulation — complex real-time judgment in high-stakes, resource-constrained environments

Science & First Principles: Astronomy and applied physics — systems-level thinking and analytical problem decomposition

Global Perspective: International travel — exposure to diverse business environments and cross-cultural collaboration
