Summary

AI and Digital Transformation Consultant with 6+ years at Deloitte, leading large-scale enterprise retail integrations, automation platforms, and analytics programs for Fortune 500 organizations. Spearheads Service Line-level AI and Automation strategy across 5+ teams, ideating and delivering AI solutions for both clients and the firm. Proven in owning client delivery modules, reducing errors by 99.9%, saving 180+ hours/month through automation, and improving SLA adherence across mission-critical systems. Recognized for executive stakeholder engagement, cross-functional leadership, Python expertise, and building scalable solutions adopted across teams and projects.

Professional Experience

Consultant – AI & Retail Automation Lead
Deloitte Consulting USI (Offices of the US in India)

*Bengaluru & Gurugram,
 India
 June 2023 – present*

- Spearheads Service Line-level AI and Automation strategy across 5+ teams, driving ideation, development, and deployment of AI-enabled solutions for both Fortune 500 client engagements and internal firm operations
- Architected and delivered a 2,000+ line Python/NiceGUI enterprise platform — a full-featured Kafka AIO tool with user authentication, ID management, Kafka message download/send, JSON→XML conversion, live monitoring, and environment browser — eliminating all manual Kafka operations
- Built PROD2PERF, a Python-driven automation framework for production-to-lower-environment data migration: bulk JSON download, manipulation, XML conversion, intelligent chunking, Java JAR invocation, and automated email reporting — saving 180 hours/month with 99.9% error reduction
- Built 15+ automation solutions across PERF environment monitoring, health-check reporting, and data reconciliation workflows — stabilized enterprise batch ecosystem, reducing production failures by ~80% and improving SLA adherence across peak retail windows
- Built an errored-jobs calendar sync notifier and email alert system, transforming error response from a reactive ~20-minute cycle to proactive alerts within 5 minutes
- Owned end-to-end client delivery for large-scale Oracle retail integrations, delivering 30+ integration tests supporting mission-critical workflows and high-volume data movement for a Fortune 500 US retailer
- Led and mentored 5+ consultants across delivery modules; led 2 PI Plannings coordinating 7+ cross-functional global teams; provided 9 weeks of weekend monitoring support ensuring SLA compliance
- Served as Python Subject Matter Expert across 4 firm-wide DTA Launchpad sessions, training 40+ learners and driving 7+ curriculum improvements across 3 sprints, fostering a culture of technical growth
- Maintained 105%+ utilization rate against an 89% firm target, logging 2,052 client hours year-to-date — reflecting consistent high-output delivery
- Represented the team in executive forums and leadership stand-ups, delivering KPI dashboards and impact reports that elevated visibility of automation and quality initiatives

Business Technology Analyst – Automation & Integration
Deloitte Consulting USI (Offices of the US in India)

*Bengaluru & Gurugram,
 India
 Aug 2020 – June 2023*

- Designed 50+ scripts (Python, Shell, PL/SQL, Java) enabling 90% error reduction and 10x time savings — some workflows reduced from minutes to milliseconds — across testing, monitoring, and reporting
- Built the base DESP Message Publishing System (Java), removing 2+ hours/day of manual effort and eliminating error-prone manual data publishing for a critical backend retail system
- Developed Python and Shell automation scripts saving 4+ FTE hours/day; created 5+ report automations keeping stakeholders informed and enabling prompt issue resolution

- Executed performance and integration testing for 20+ Oracle enterprise integrations, ensuring system reliability under peak business volumes and enabling production deployments
- Designed a multi-threaded Python API testing framework, replacing Postman for high-volume integration testing and enabling bulk parallel API call execution at scale

Early Professional Experience – Analyst & Cybersecurity Intern

Deloitte USI / EXL Services

India

June 2019 – June 2020

- Supported a healthcare client engagement at Deloitte USI, contributing to testing, data workflows, and delivery support during a 6-month industrial training program
- Performed vulnerability analysis and penetration testing at EXL Services across enterprise infrastructure and applications, strengthening security posture and risk awareness

Education

Thapar Institute of Engineering & Technology

Bachelor of Technology in Computer Engineering (Computer & Network Security)

Patiala, Punjab, India

June 2016 – Aug 2020

- Finalist, Smart India Hackathon (SIH) 2018 — built Project Haazri, an automated smart attendance application adopted as a proof-of-concept for institutional use
- Capstone Project: Secure Autonomous Interceptor Drone (SAID) using Python, OpenCV, and flight dynamics for real-time object detection and navigation
- Ranked nationally in college Toastmasters chapter for leadership communication and public speaking excellence

Leadership Experience

Service Line AI Leadership: Spearheads AI and Automation strategy across 5+ service line teams, ideating and delivering impactful AI solutions for clients and the firm

Client Delivery Ownership: Owned client delivery modules, led sprint reviews, and delivered executive-ready KPI dashboards, solution walkthroughs, and impact reports

Team Leadership & Mentorship: Led 5+ consultants, mentored 3+ team members professionally and technically; acted as team lead during leadership absence

Cross-Functional Program Coordination: Led 2 PI Plannings coordinating 7+ global teams across dependency management, sprint planning, and release readiness

Knowledge & Capability Building: Python SME for 40+ firm learners; authored playbooks, video guides, and training materials adopted across teams and projects

Certificates & Awards

Deloitte AI Certified: Deloitte AI Academy (Cohort-1-CDF) — 9-month program of learning, testing, and capstone delivery; ranked 3rd out of 134 practitioners by XP earned

Google Advanced Data Analytics Certificate: Advanced statistics, machine learning concepts, and large-scale data analysis

Google Data Analytics Certificate: SQL, data visualization, and analytical problem-solving

Oracle Certifications (Active): Multiple active Oracle certifications across database, integrations, and enterprise systems

Skills & Personal

AI & Automation: Python Automation (Advanced), Event-Driven Architecture (Kafka), AI Strategy, Analytics Pipelines, Near-Real-Time Monitoring, Machine Learning (Foundational)

Enterprise Systems: Oracle Integration Suite, Oracle DB, PL/SQL Optimization, Batch Processing, Enterprise Testing, Performance Engineering

Consulting & Delivery: Digital Transformation, Client Delivery, Agile/SAFe, Program Governance, Executive Reporting, Value Realization, Stakeholder Management

Programming: Python (Advanced), SQL (Advanced), PL/SQL (Advanced), Java (Proficient), Shell Scripting

Tools & Platforms: NiceGUI, Streamlit, Tableau, GitHub, CI/CD, Linux, Dashboarding & Visualization
